

Tabor is a fun school with interesting lessons. It has amazing facilities.

I was nervous but I soon found my way around.

I feel really lucky that I am a Tabor student. You should know that you will love it here.

The things I like at Tabor are the help and support we get, the lessons and the astroturf.

Science is really good. Its nothing like primary school.

There are always lots of teachers
around to help you find your way to
lesson.

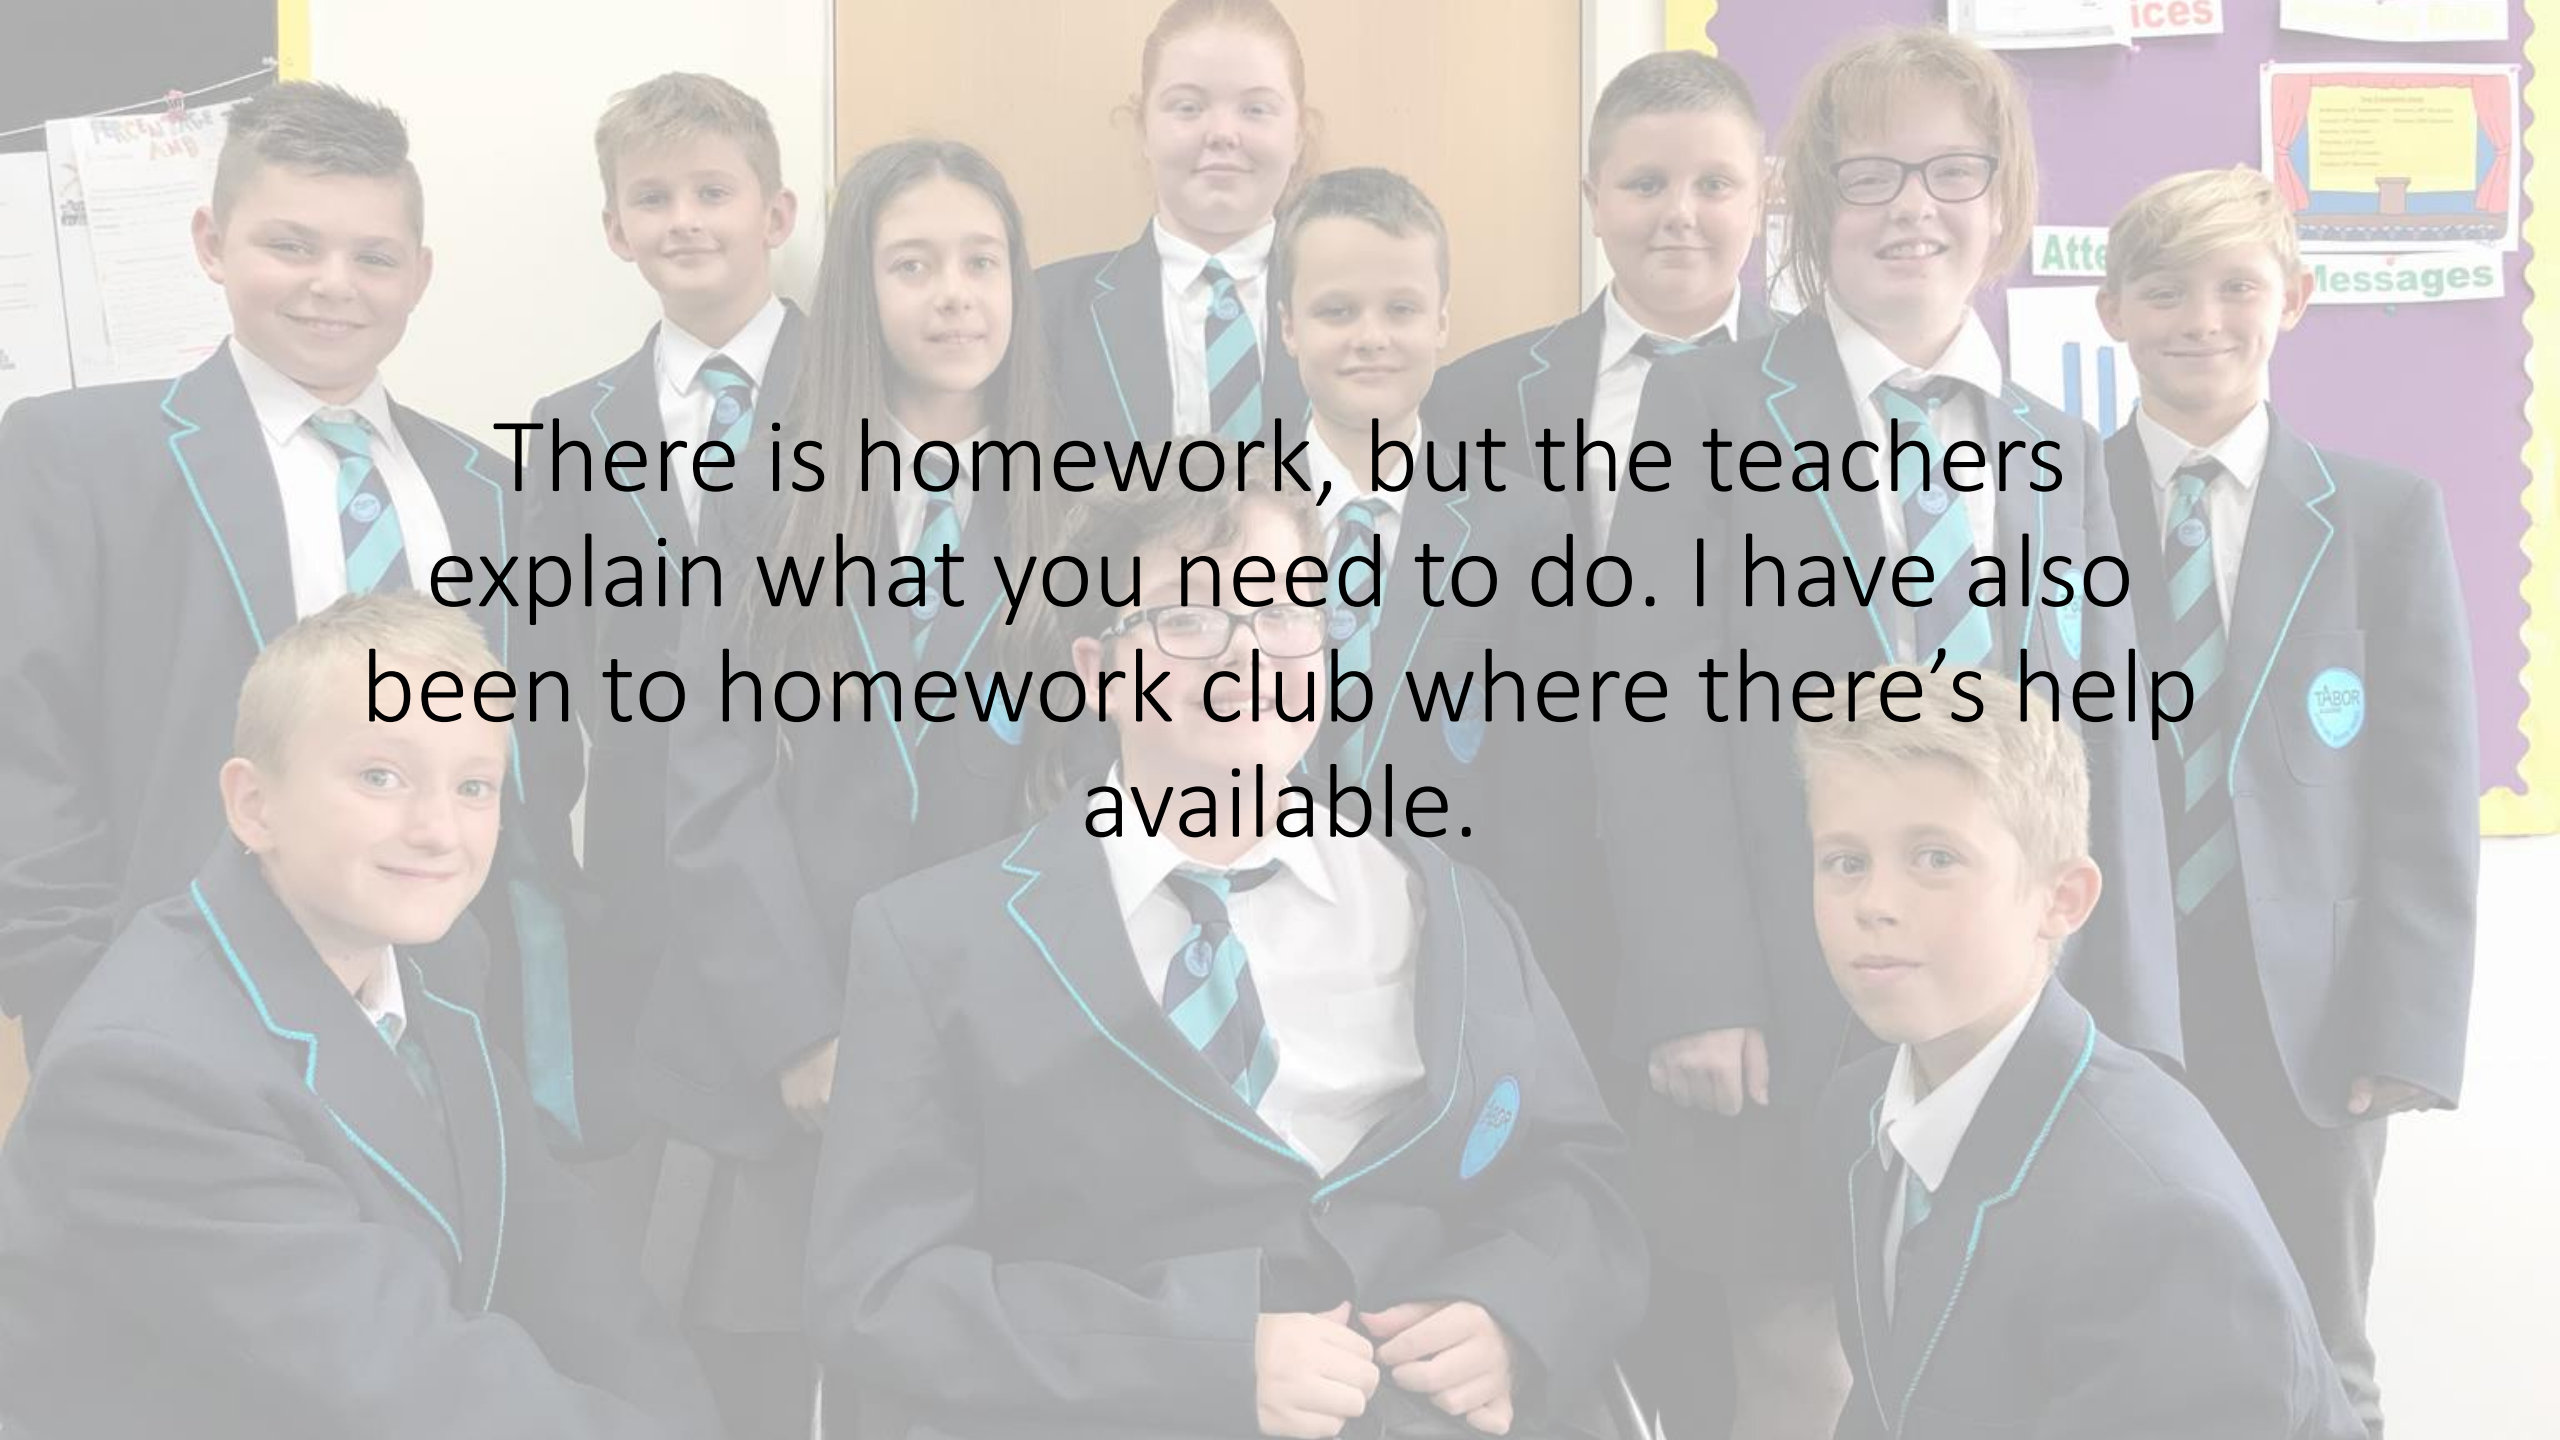

I feel like it's the best school ever because there are so many great teachers, and helpful people, making us feel welcome.

I got lost the first day but now its easy to find my way around.

I like starting and ending the day with my form tutor.

There is homework, but the teachers explain what you need to do. I have also been to homework club where there's help available.
